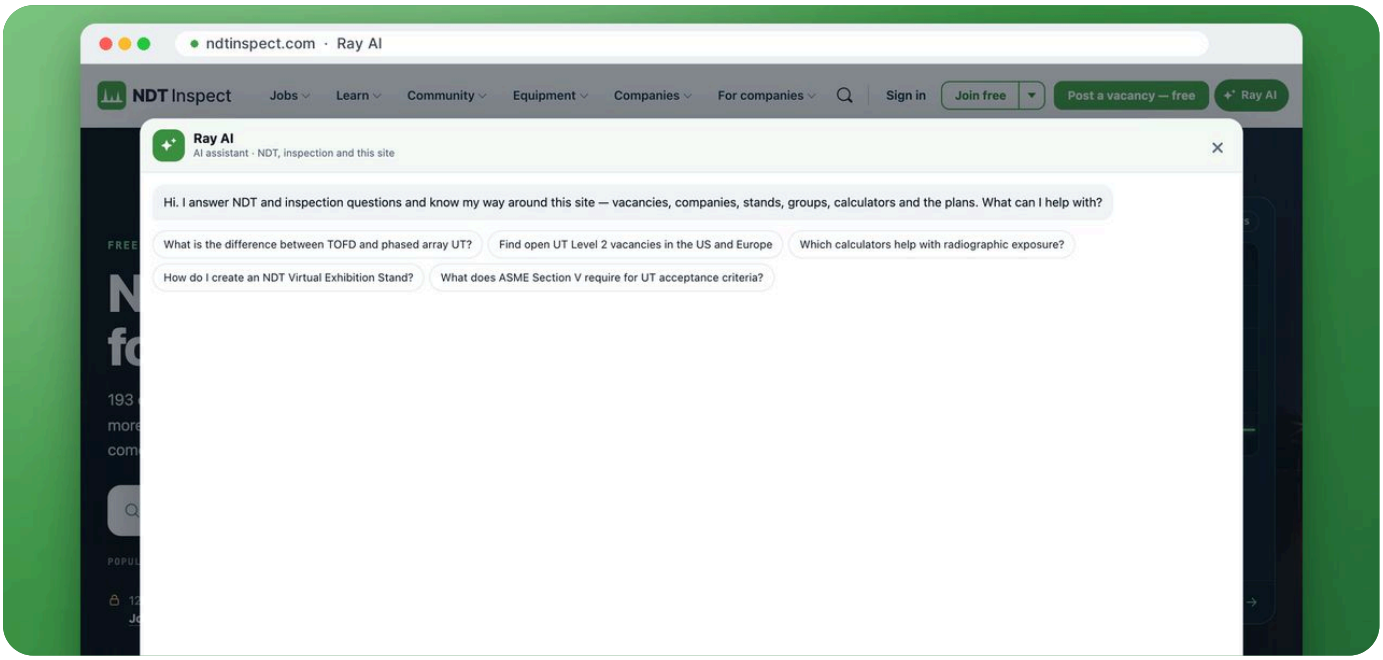
NDT Inspect

PRODUCT SHEET

FOR THE WHOLE COMMUNITY

Ray, the NDT assistant

Ray is the AI assistant built into NDT Inspect. It answers NDT and inspection questions and knows its way around the site: vacancies, companies, stands, groups, calculators and plans. Ask the difference between TOFD and phased array, or which calculator helps with a radiographic exposure. Click Ray AI at the top of any page to try it; members get more questions a day.



WHAT YOU GET

- Answers to NDT and inspection questions in plain language
- Knows the site: vacancies, companies, stands, groups, calculators and plans
- Points you to the right calculator, group or page
- Opens from the Ray AI button at the top of every page

HOW IT WORKS

1. Click Ray AI at the top of any page.
2. Ask your question.
3. Follow the links Ray gives to vacancies, calculators or groups.

Good to know. Visitors can try a few questions a day; members get more. General guidance only: follow your written procedure and the applicable code.
