SUMMARY

Competent, capable, and experienced QA/QC professional seeking to be an integral part of an organization that leverages my expertise in quality control, quality assurance and inspection supervision, to achieve mutual growth and success. Knowledge, skills and abilities in enhancing product quality and team performance with a collaborative approach to shared success. Training, education and experience with welding, and project management with a strong emphasis on safety.

EXPERIENCE

Northwind Midstream: QA/QC Inspector (Jal, New Mexico)

04/24 - Current

- Provided training for new civil and mechanical inspectors on inspection methods and tools according to client standards. Provided feedback, guidance and instructions to improve the overall performance of staff.
- Performed duties as a liaison between several different departments, engineering and inspection staff to ensure high quality standards of acceptance were achieved, facilitated by utilizing clear and concise communication.
- Collaborated with engineering teams to resolve complex quality issues to ensure product performance met or exceeded the client's expectations.
- Developed and utilized an improved method of accurate documentation for all inspections and provided timely daily and weekly reports on the key performance indicators related to quality assurance expectations.
- Coordinated Non-Destructive Testing (NDT) crews and performed quality control functions utilizing Magnetic Particle Testing (MT), both dry and wet mag methods, as well as Dye Penetrant Testing (PT) inspection methods in accordance with API 1104 standards, often finding production defects not found in initial inspections.
- Exceeded productivity goals, by organizing and directing the scope of work based on priority deadlines of each phase of the project, with attention to detail on inspections.
- Dedicated safety professional with a proven record of success as demonstrated by adhering to industry standards and client protocols.

Performance Contractors: QA/QC Inspector (Morgan City, Louisiana)

02/2022 to 04/2024

- Conducted staff training and onboarding, with an emphasis on inspection methods and procedures as directed by client standards and specifications on the use of inspection tools, techniques and best practices.
- Functioned as an interdepartmental liaison and ensured clear communication regarding product specifications and any needed adjustments that were made due to non-conformance issues.
- Performed quality control procedures on piping utilizing MT and PT methods of Non-Destructive Testing and coordinated radiographic inspection of weldments.
- Ensured proper implementation of materials as cited in the Piping and Instrumentation Data (P&ID) drawings.
- Maintained and provided accurate and timely reports on all findings, status updates as well as non-conformance quality issues along with the final disposition of identified deficiencies.

Turner Industries: QA/QC Inspector (Lake Charles, Louisiana)

09/2010 to 12/2021

- Managed and directed a team of inspection staff in the QA/QC process for the client, by ensuring proper inspection techniques, tools and best practices were adhered to during the project.
- Performed inspections to ensure quality utilizing MT and PT methods of inspection as well as visual inspection of welds, often times finding defects and discontinuities missed by previous inspections.
- Conducted final review of completed projects, verifying all materials are tracked, installed properly, are in excellent operating condition and compliant with approved industry regulations and company standards of construction.
- Provided written reports detailing project status, estimated timeline and resolved issues during the construction process.
- Ensured project safety goals were met and adhered to by inspection team by abiding by strict safety protocols during all aspects of the inspection process.

Dynamic Industries: Construction Superintendent (Lake Charles, Louisiana)

01/2007 to 08/2010

- Managed and directed the day-to-day activities of construction crews as the yard supervisor, and coordinated all aspects of construction on oil and gas projects, from ordering and reviewing materials to conducting quality and safety reviews to ensure high standards were met and exceeded.
- Assigned crews to tasks, monitored the daily progress and provided feedback and guidance as needed to ensure staff completed the work as required by customer specifications and industry standards.
- Conducted quality reviews on the overall scope of project daily, mindful of priorities and deadlines as dictated by the client, changing outdated or ineffective procedures as needed to streamline the process and increase efficiency.
- Performed quality inspections on completed tasks in order to ensure product adheres to customer and industry standards, utilizing visual inspection, as well as MT and PT inspection methods in addition to the coordination of NDT crews for radiographic inspection.
- Provided detailed written reports tracking progress, resolved issues of construction as well as accountability for staff time management.
- Ensured safety standards and protocols were met and exceeded by constantly monitoring construction crews in the performance of their assigned tasks, mentoring and coaching crew members when safety infractions are observed.
- Completed each project by conducting quality at the source reviews for every aspect of the project, from confirming traceability of materials and proper installation to adherence to applicable standards of the final product by confirmation of the proper installation of piping and support structures.

SKILLS

- ISO and P&ID standards knowledge
- Isometric and as-built drawings knowledge
- Product inspections compliance
- Visual Inspection
- Magnetic Particle Testing and Dye Penetrant Testing
- Project management
- Quality control (QC) processes
- Quality Management
- Supervision and workforce management
- MS Word and Excell proficiency
- Computer proficiency
- Safety procedures and OSHA standards

CERTIFICATIONS

- OSHA 30 and OSHA 510
- Project Management Professional (PMP) coursework
- Current TWIC

EDUCATION

- Associates of Science, General Studies
Sowela Tch. Lake Charles, LA.
- Trade School: Welding
Sowela Tch. Lake Charles, LA.
